

Get to know your customers better and **keep your jewelry safe!**

With **over 20 years of experience** serving the unique needs of the jewelry industry, we understand the importance of safeguarding your most valuable assets, while increasing sales opportunities.

Eyeson tools for jewelers are designed to promote and track cross selling, up selling, and other sales increase tools, while improving the overall store security. We offer video surveillance solutions designed specifically for **jewelry stores like yours!**

We prioritize people-centered enterprise surveillance and security management, allowing your jewelry to thrive both in its operations and in protecting its most valuable assets.

Eyeson 360 - A surveillance and security management platform designed for jewelers like you!

Let your security, loss prevention and operations thrive! We offer you advanced monitoring capabilities and real-time alerts.

Say goodbye to watching endlessly videos. **Eyeson 360** offers you the smarter insights into your daily operations, ensuring safety, security, and prosperity back into your hands.

Easy Eyeson Kit

Gain time and peace of mind!

- Tired of not being able to review video footage remotely? Do you only have live viewing available? Those days are over!
- From 4K cameras with embedded microphones to POS integration and face recognition technology, **Easy Eyeson has everything you need to keep your jewelry safe** and best of all, you can install it yourself!
- Experience six months of video and audio recording history at 8 frames per second, efficient remote access via PC, Mac or your favorite mobile device.

Visitor Counting

Boost efficiency and know it all!

- With a specialized people-counting camera that supports the separate counting of people entering, exiting, and passing by a given area.
- **Our visitor counting technology** accurately tracks traffic, allowing you to optimize staffing and security measures.

AI Face Recognition

Know exactly who visited your jewelry store!

- Make your security smarter with our AI-powered face recognition technology.
- Identify people by their face and clothing attributes.
- **Our cloud portal search by face and clothing** allows real-time detection, ensuring the safety of your clients and staff.

AI Virtual Fence

Find out who came back in the middle of the night to open the dumpster

- Surround your jewelry with AI based perimeter intrusion detection. AI Fence does not fall asleep and monitors multiple cameras through the night with greater efficiency and accuracy than human guards-based monitoring.
- **Our AI Fence offers a two-way audio and video response**, protecting your jewelry against trespassing and vandalism.

Burglar Alarm Video Verification

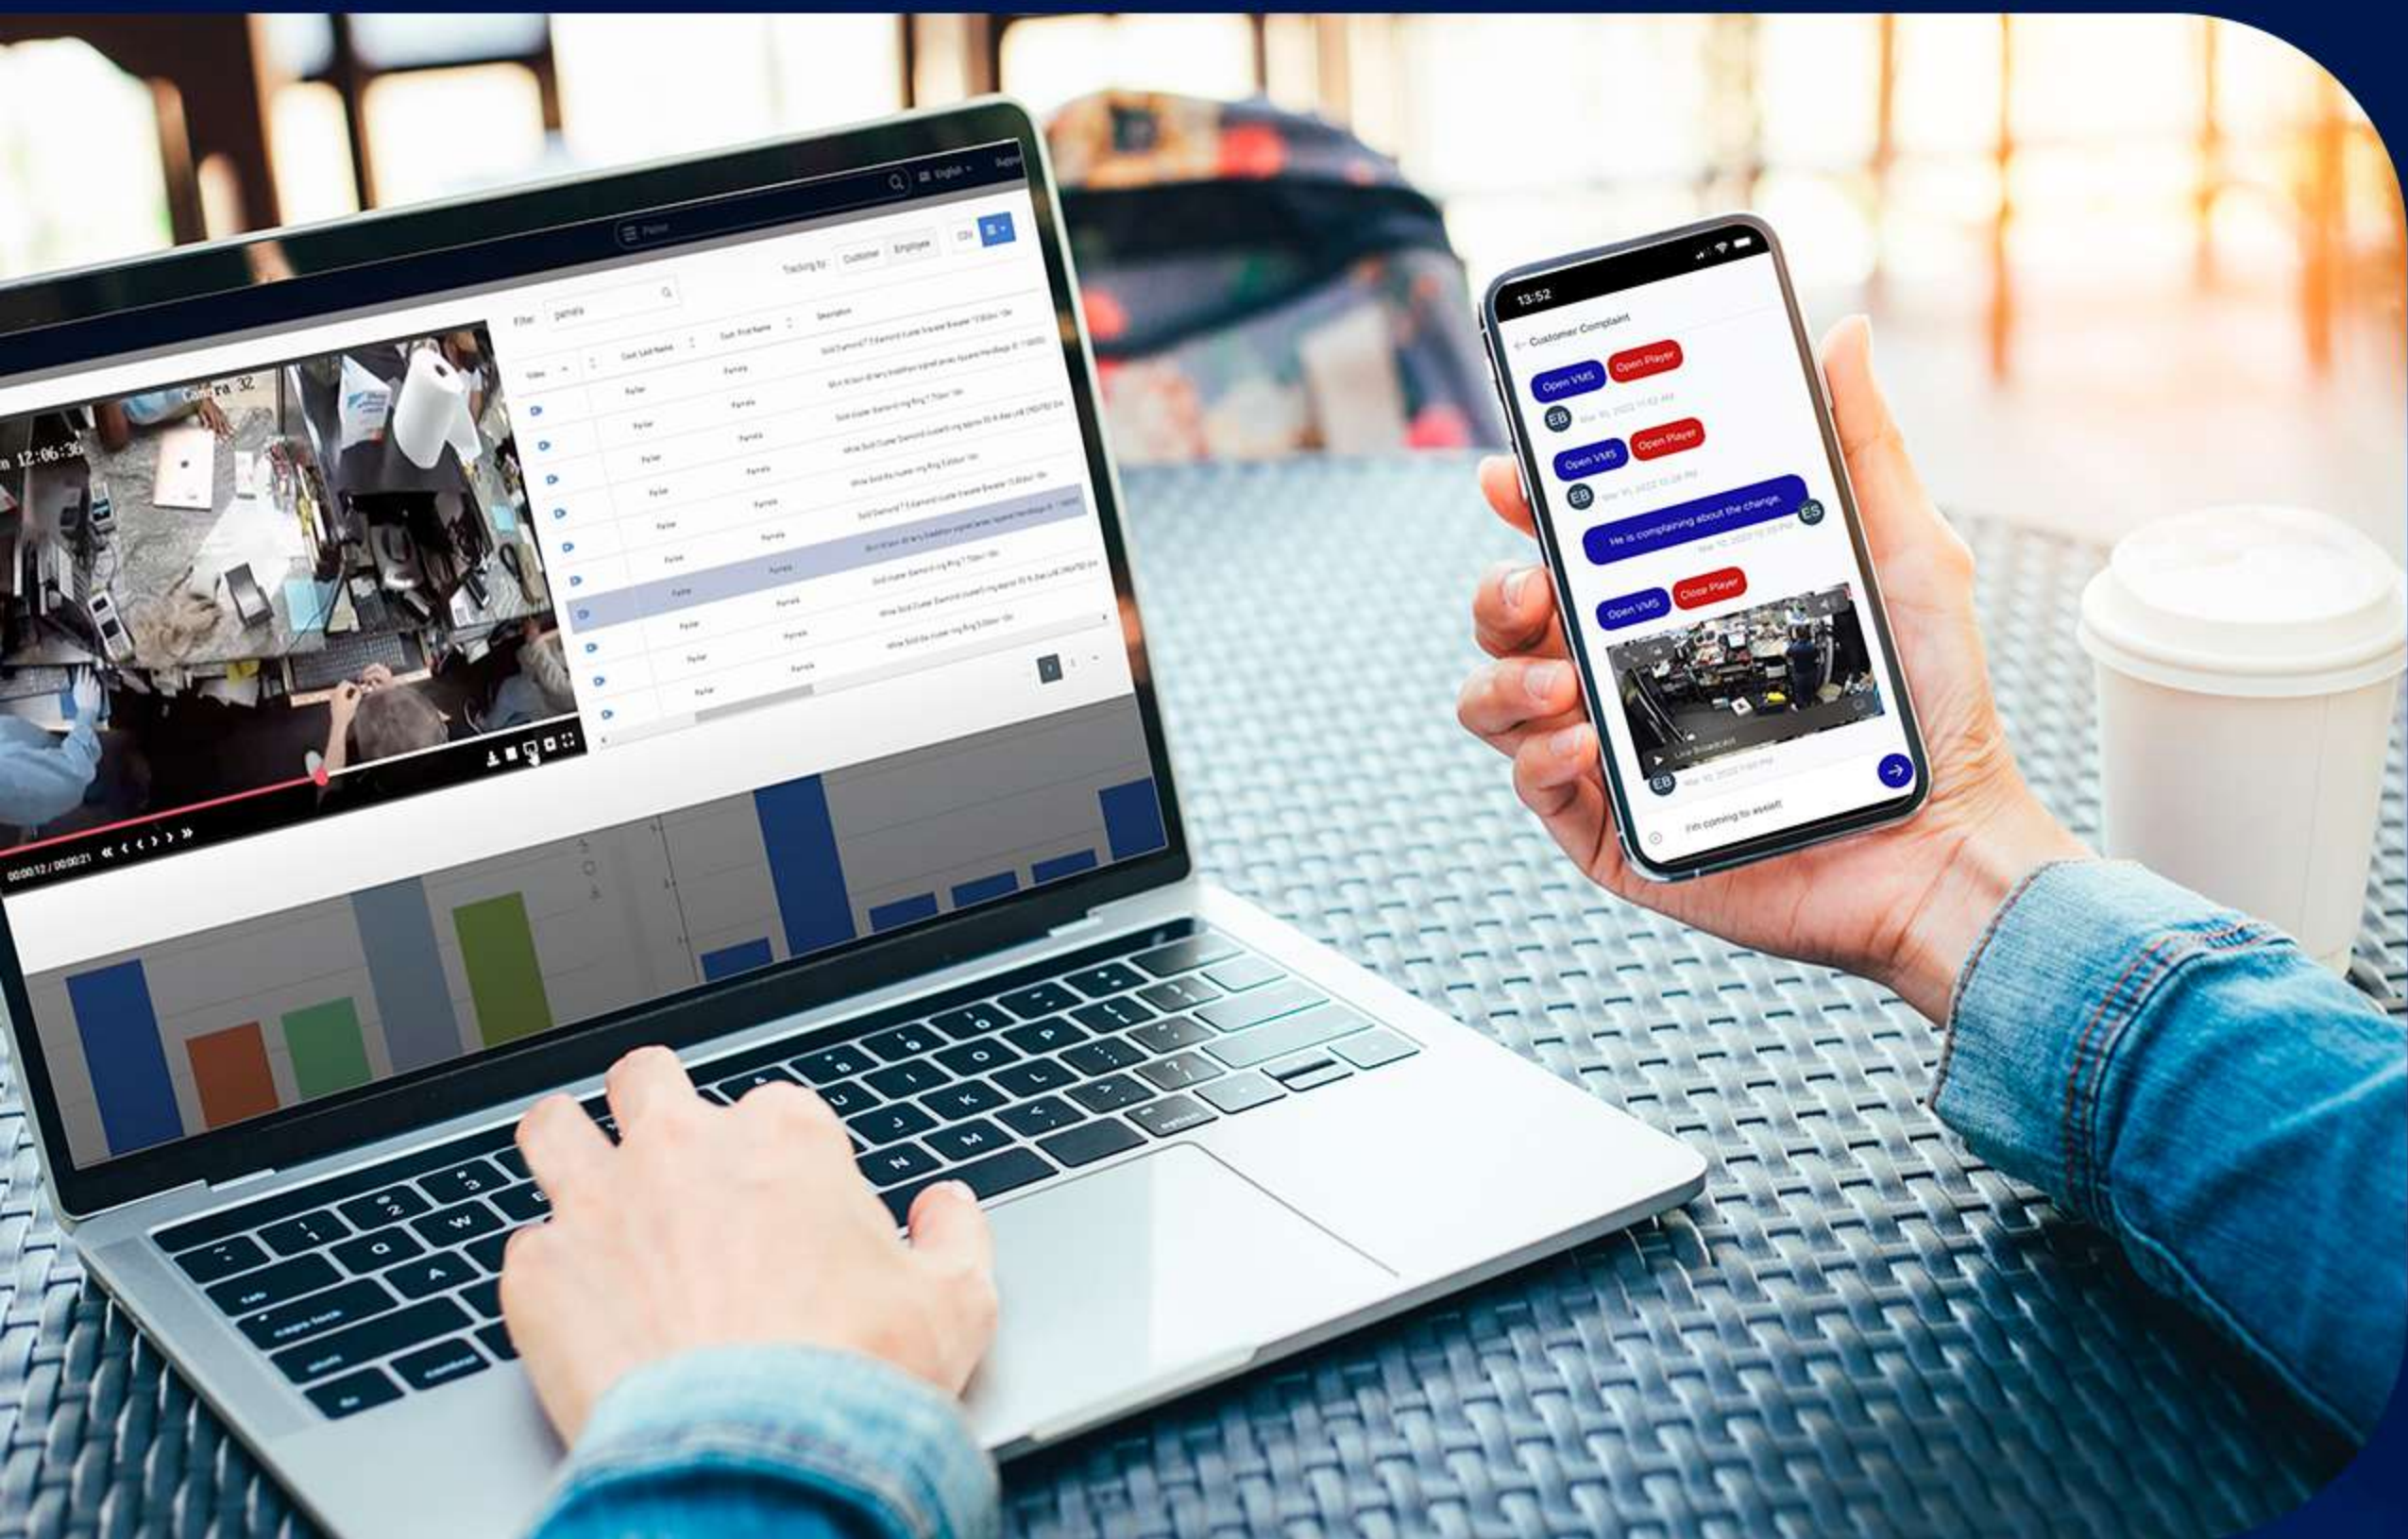

Rest assured with our 24/7 monitoring solutions

- Sleep well knowing that professional security analysts are checking your cameras when your burglar alarm gets triggered in the middle of the night.
- **We run daily tests of your cameras connectivity.** All cameras in your jewelry store are checked upon any alarm.

Integrated Video System

Over 20 years designing security and loss prevention solutions for high-risk industries

- Seamlessly integrate all systems in your jewelry to the video footage of the cameras for enhanced management, loss prevention and smarter security.
- With nearly 100 POS integrations and customizable features, we integrate our video surveillance solutions into your existing operations, without interrupting your business hours. Easily expandable to all cameras in your jewelry store.

Get peace of mind by knowing everything that happens at your POS!

Join other jewelry stores who trust Eyeson to secure their stores, **leading their businesses to success.**
