

Get to know your customers better and **keep your jewelry safe!**

With **more than 20 years of experience** serving the unique needs of the jewelry industry, **we understand the importance of safeguarding your most valuable assets, while increasing sales opportunities.**

We are an **affordable way to get your security system up and running**, and get valuable analytics at the same time.

Eyeson 360 - A surveillance and security management platform designed for jewelers like you!

Let your security, loss prevention and operations thrive!

We offer you advanced monitoring capabilities and real-time alerts.

Easily find what you need to see in seconds, from any device. **Eyeson 360** offers you the smartest insights into your daily operations, ensuring safety, security, and prosperity back into your hands.

Easy Eyeson Kit

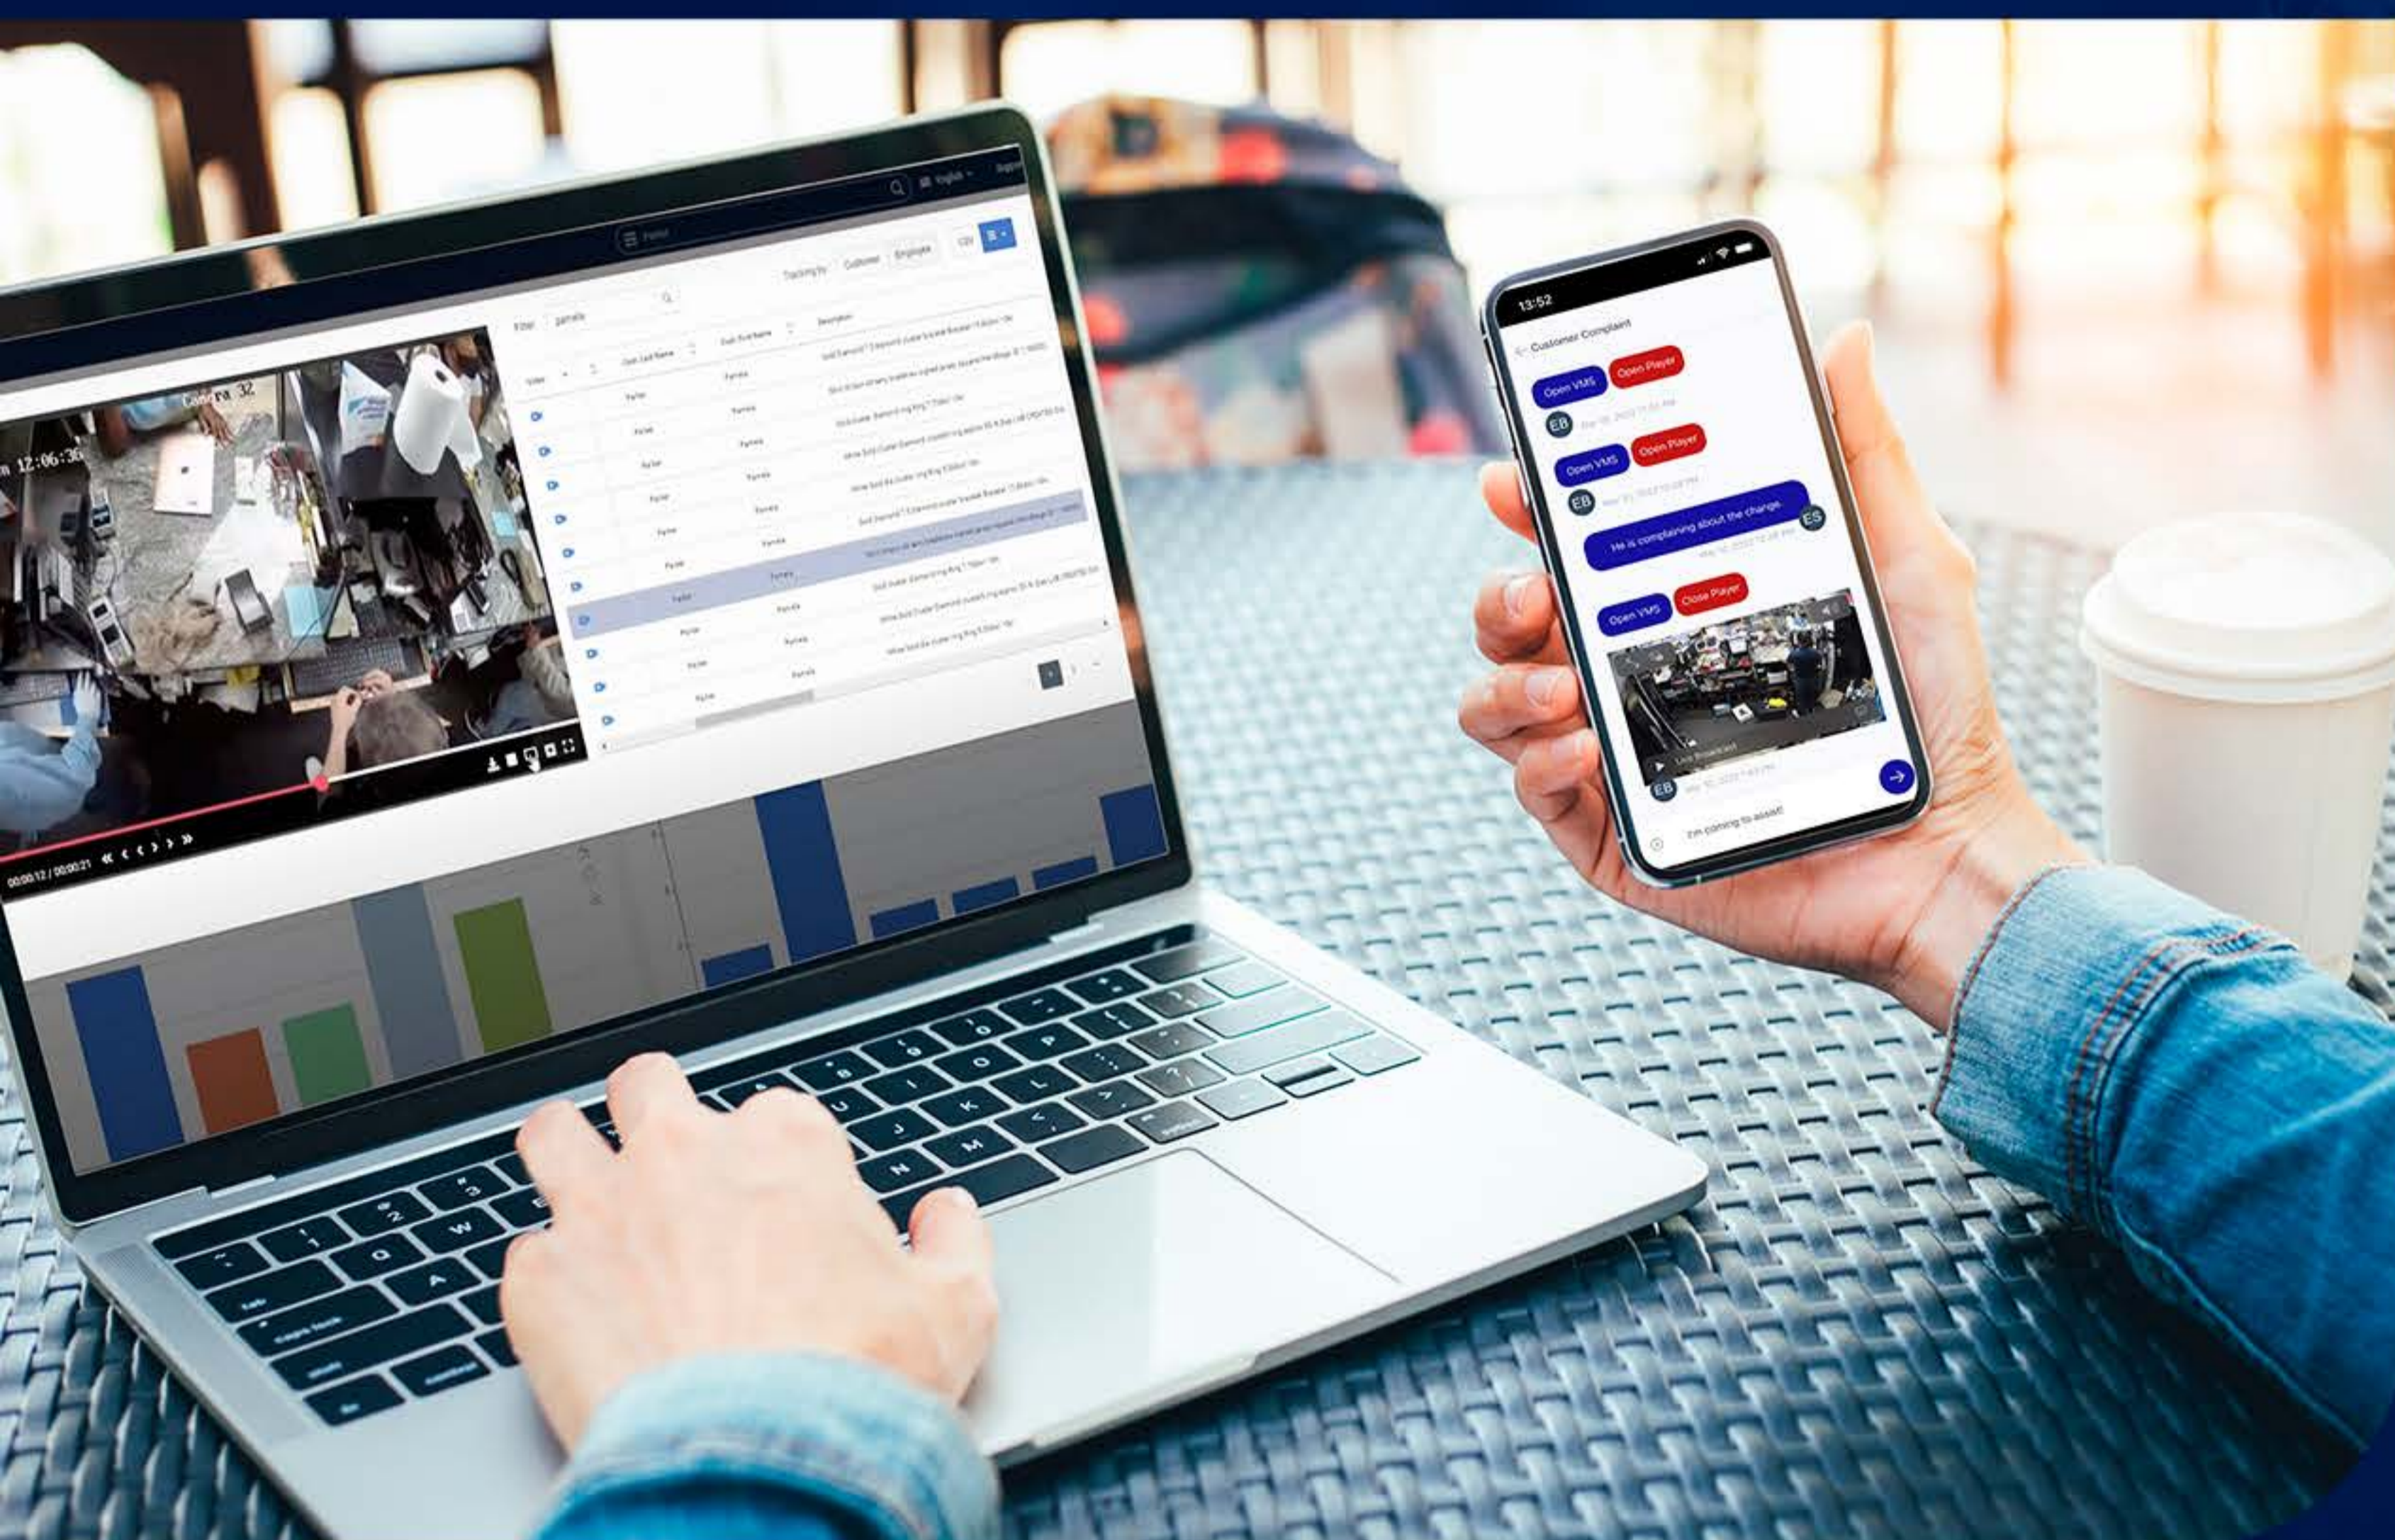

Gain time and peace of mind!

- Tired of not being able to review video footage remotely? Do you only have live viewing available? Those days are over!
- From 4K cameras with embedded microphones to POS integration and face recognition technology, **Easy Eyeson has everything you need to keep your jewelry safe** and best of all, you can install it yourself!
- Experience six months of video and audio recording history at 8 frames per second, efficient remote access via PC, Mac or your favorite mobile device.

Easy Eyeson Video Integration

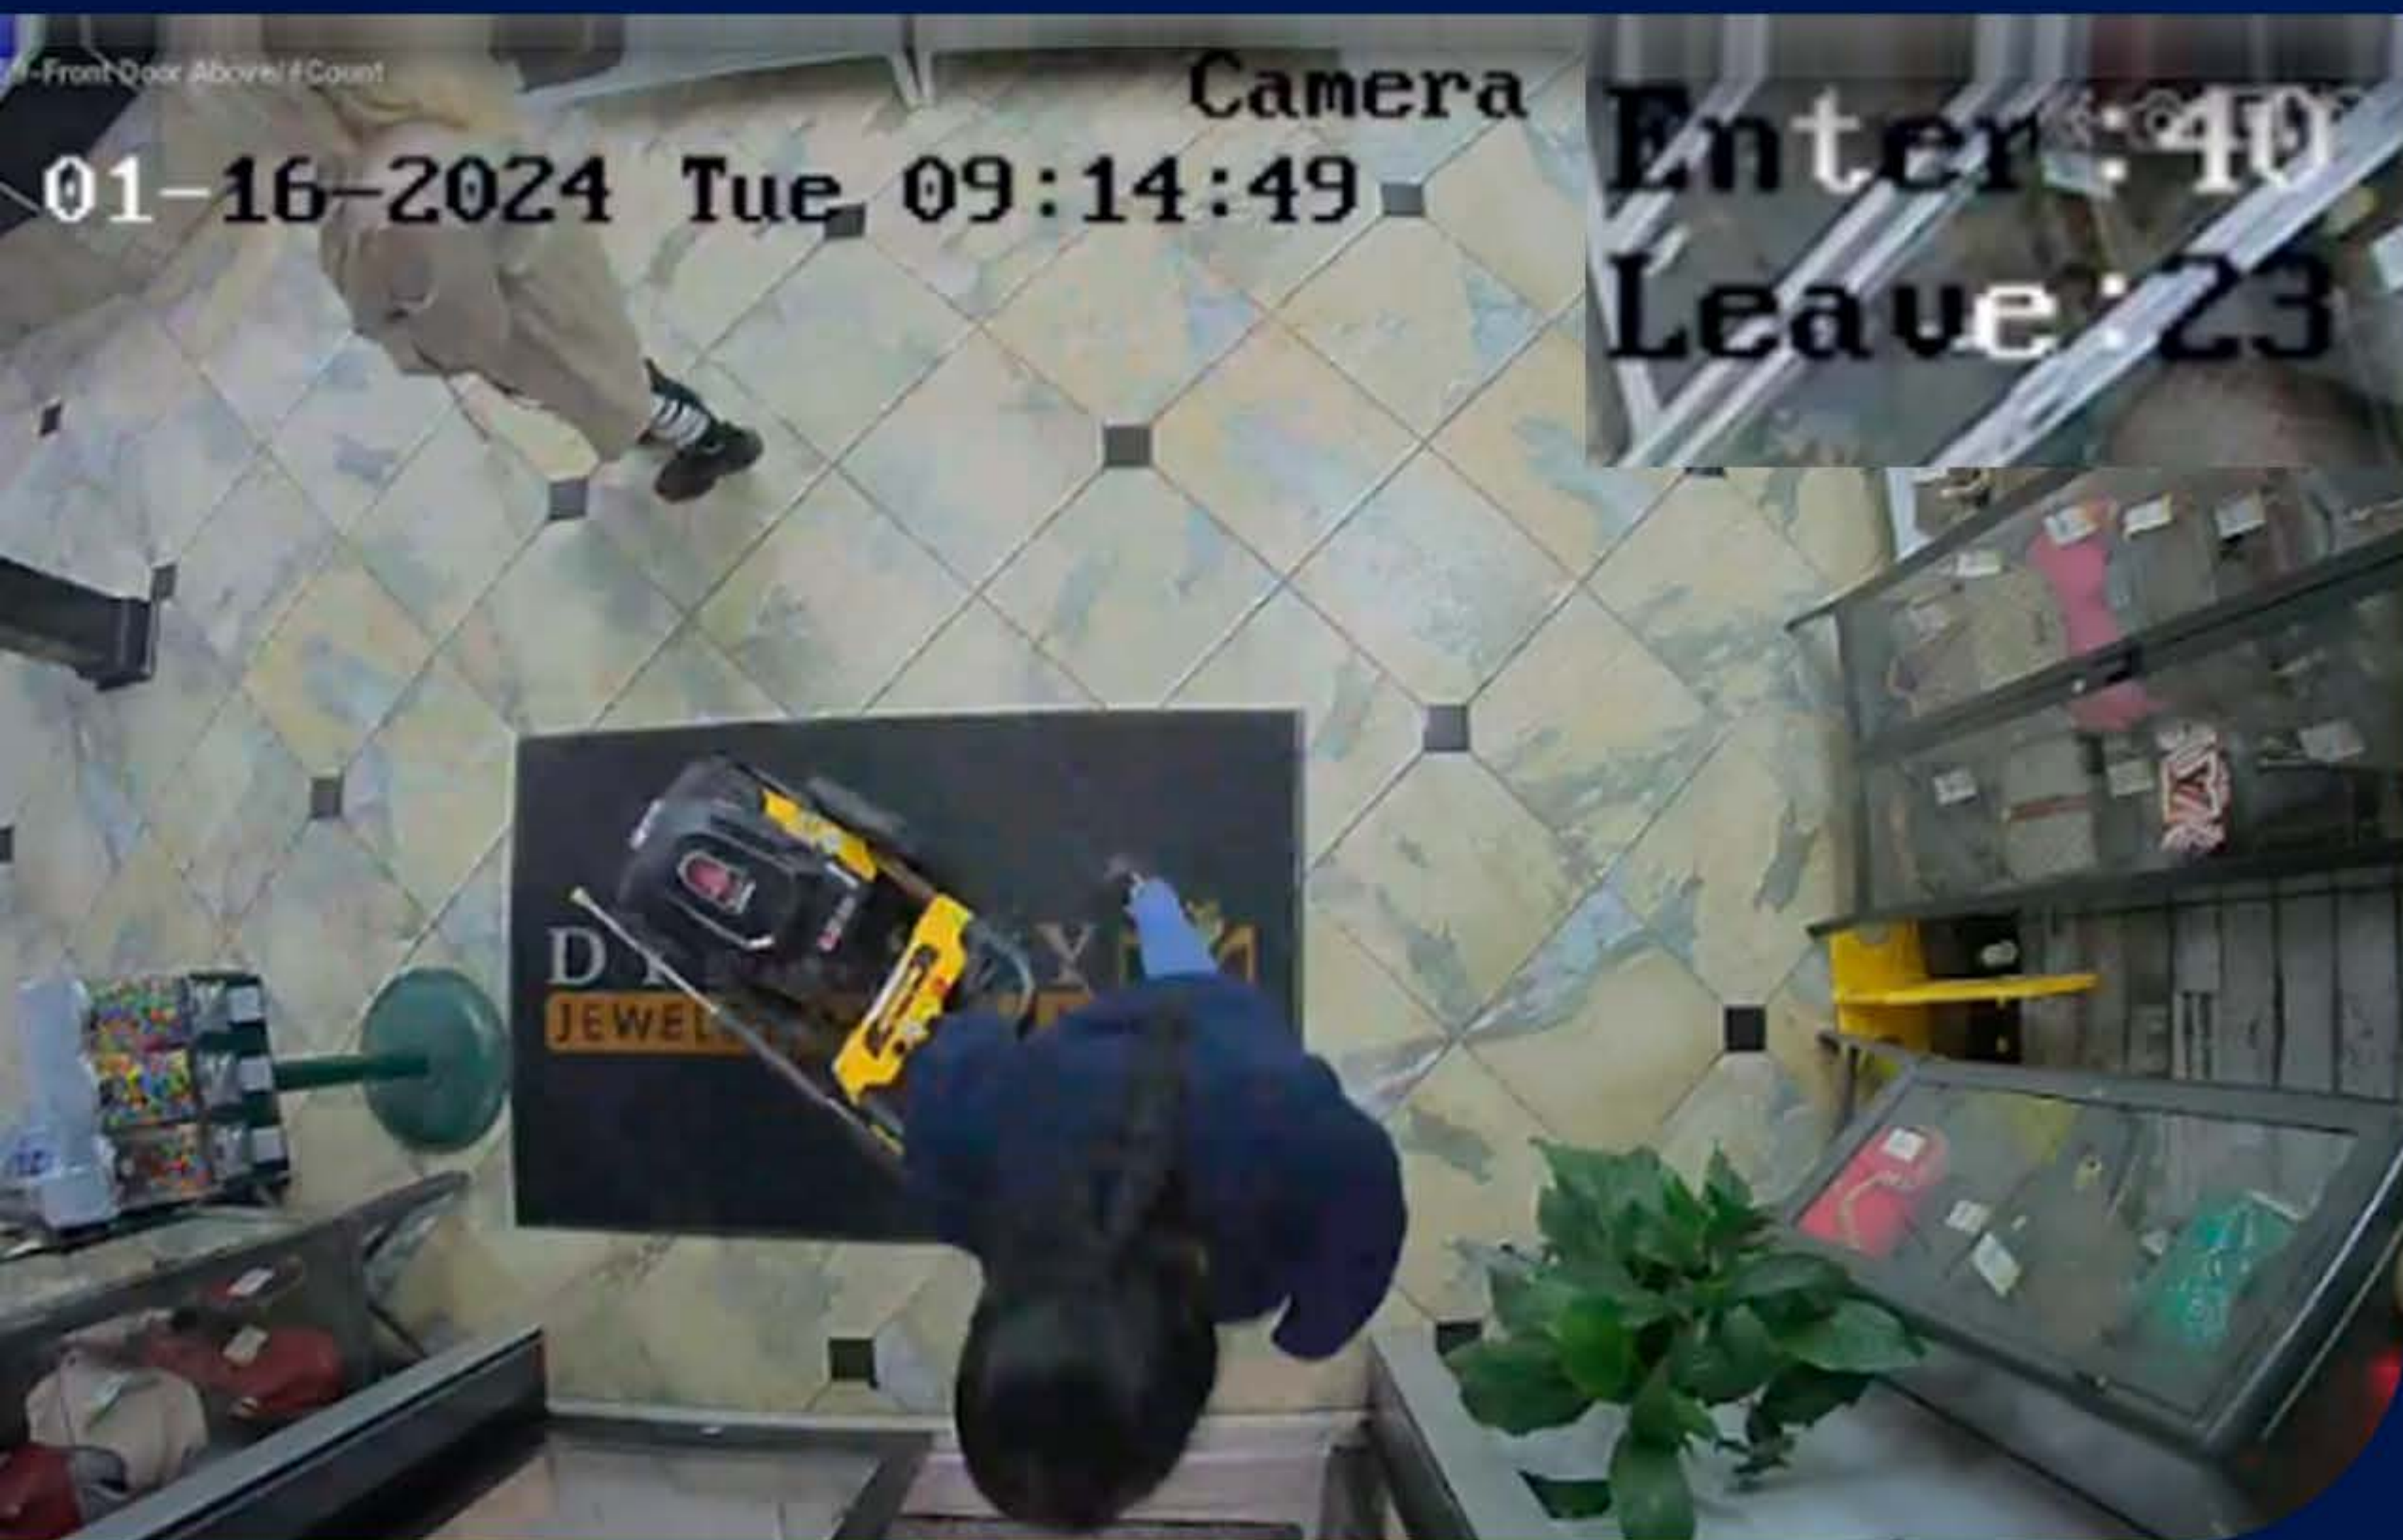

Over 20 years designing security and loss prevention solutions for high-risk industries

- Seamlessly integrate all systems in your jewelry store to the video footage of the cameras for enhanced management, loss prevention and smarter security.
- **With nearly 100 POS integrations** and customizable features, we integrate our video surveillance solutions into your existing operations, without interrupting business hours. Easily expandable to all cameras in your jewelry store.
- **MyEyeson Cloud Dashboard:** Secured cloud access to loss prevention and business intelligence tools for business operations of all size. It includes store occupancy reports and alerts, staff performance analytics (KPIs), POS data linked to camera video footage, real time exception alerts, investigation and task management tools.

Visitor Counting

Boost efficiency and know it all!

- **Our visitor counting technology** accurately tracks traffic, allowing you to optimize staffing and security measures.
- With a specialized people-counting camera that supports the separate counting of people entering, exiting, and passing by a given area.

AI Face Recognition

Know exactly who visited your jewelry store

- Make your security smarter with our AI-powered face recognition technology.
- Identify people by their face and clothing attributes.
- **Our cloud portal search by face and clothing** allows real-time detection, ensuring the safety of your clients and staff.

Increase the security of your store with these additional services!

(Optional with the Easy Eyeson kit)

Eyeson AI Sentinel

Stop intruders with audio response!

- AI based video analytics will use your camera footage to stop intruders and send real-time signals to security operators in a 24/7/365 video monitoring center.
- Security operators will confirm the intrusion and activate speakers installed at your facility, to engage intruders via audio, in an effort to derail the burglary. Operators will also dispatch police and send video footage to law enforcement as requested.
- **Sleep well with a proactive response system**, knowing that you have an extra layer of protection beyond your current burglar alarm system.

Eyeson AI Sentinel may be combined with Eyeson Video Verify, Eyeson AI Fence and Eyeson Guard for additional protection of your operations.

Eyeson Video Verify

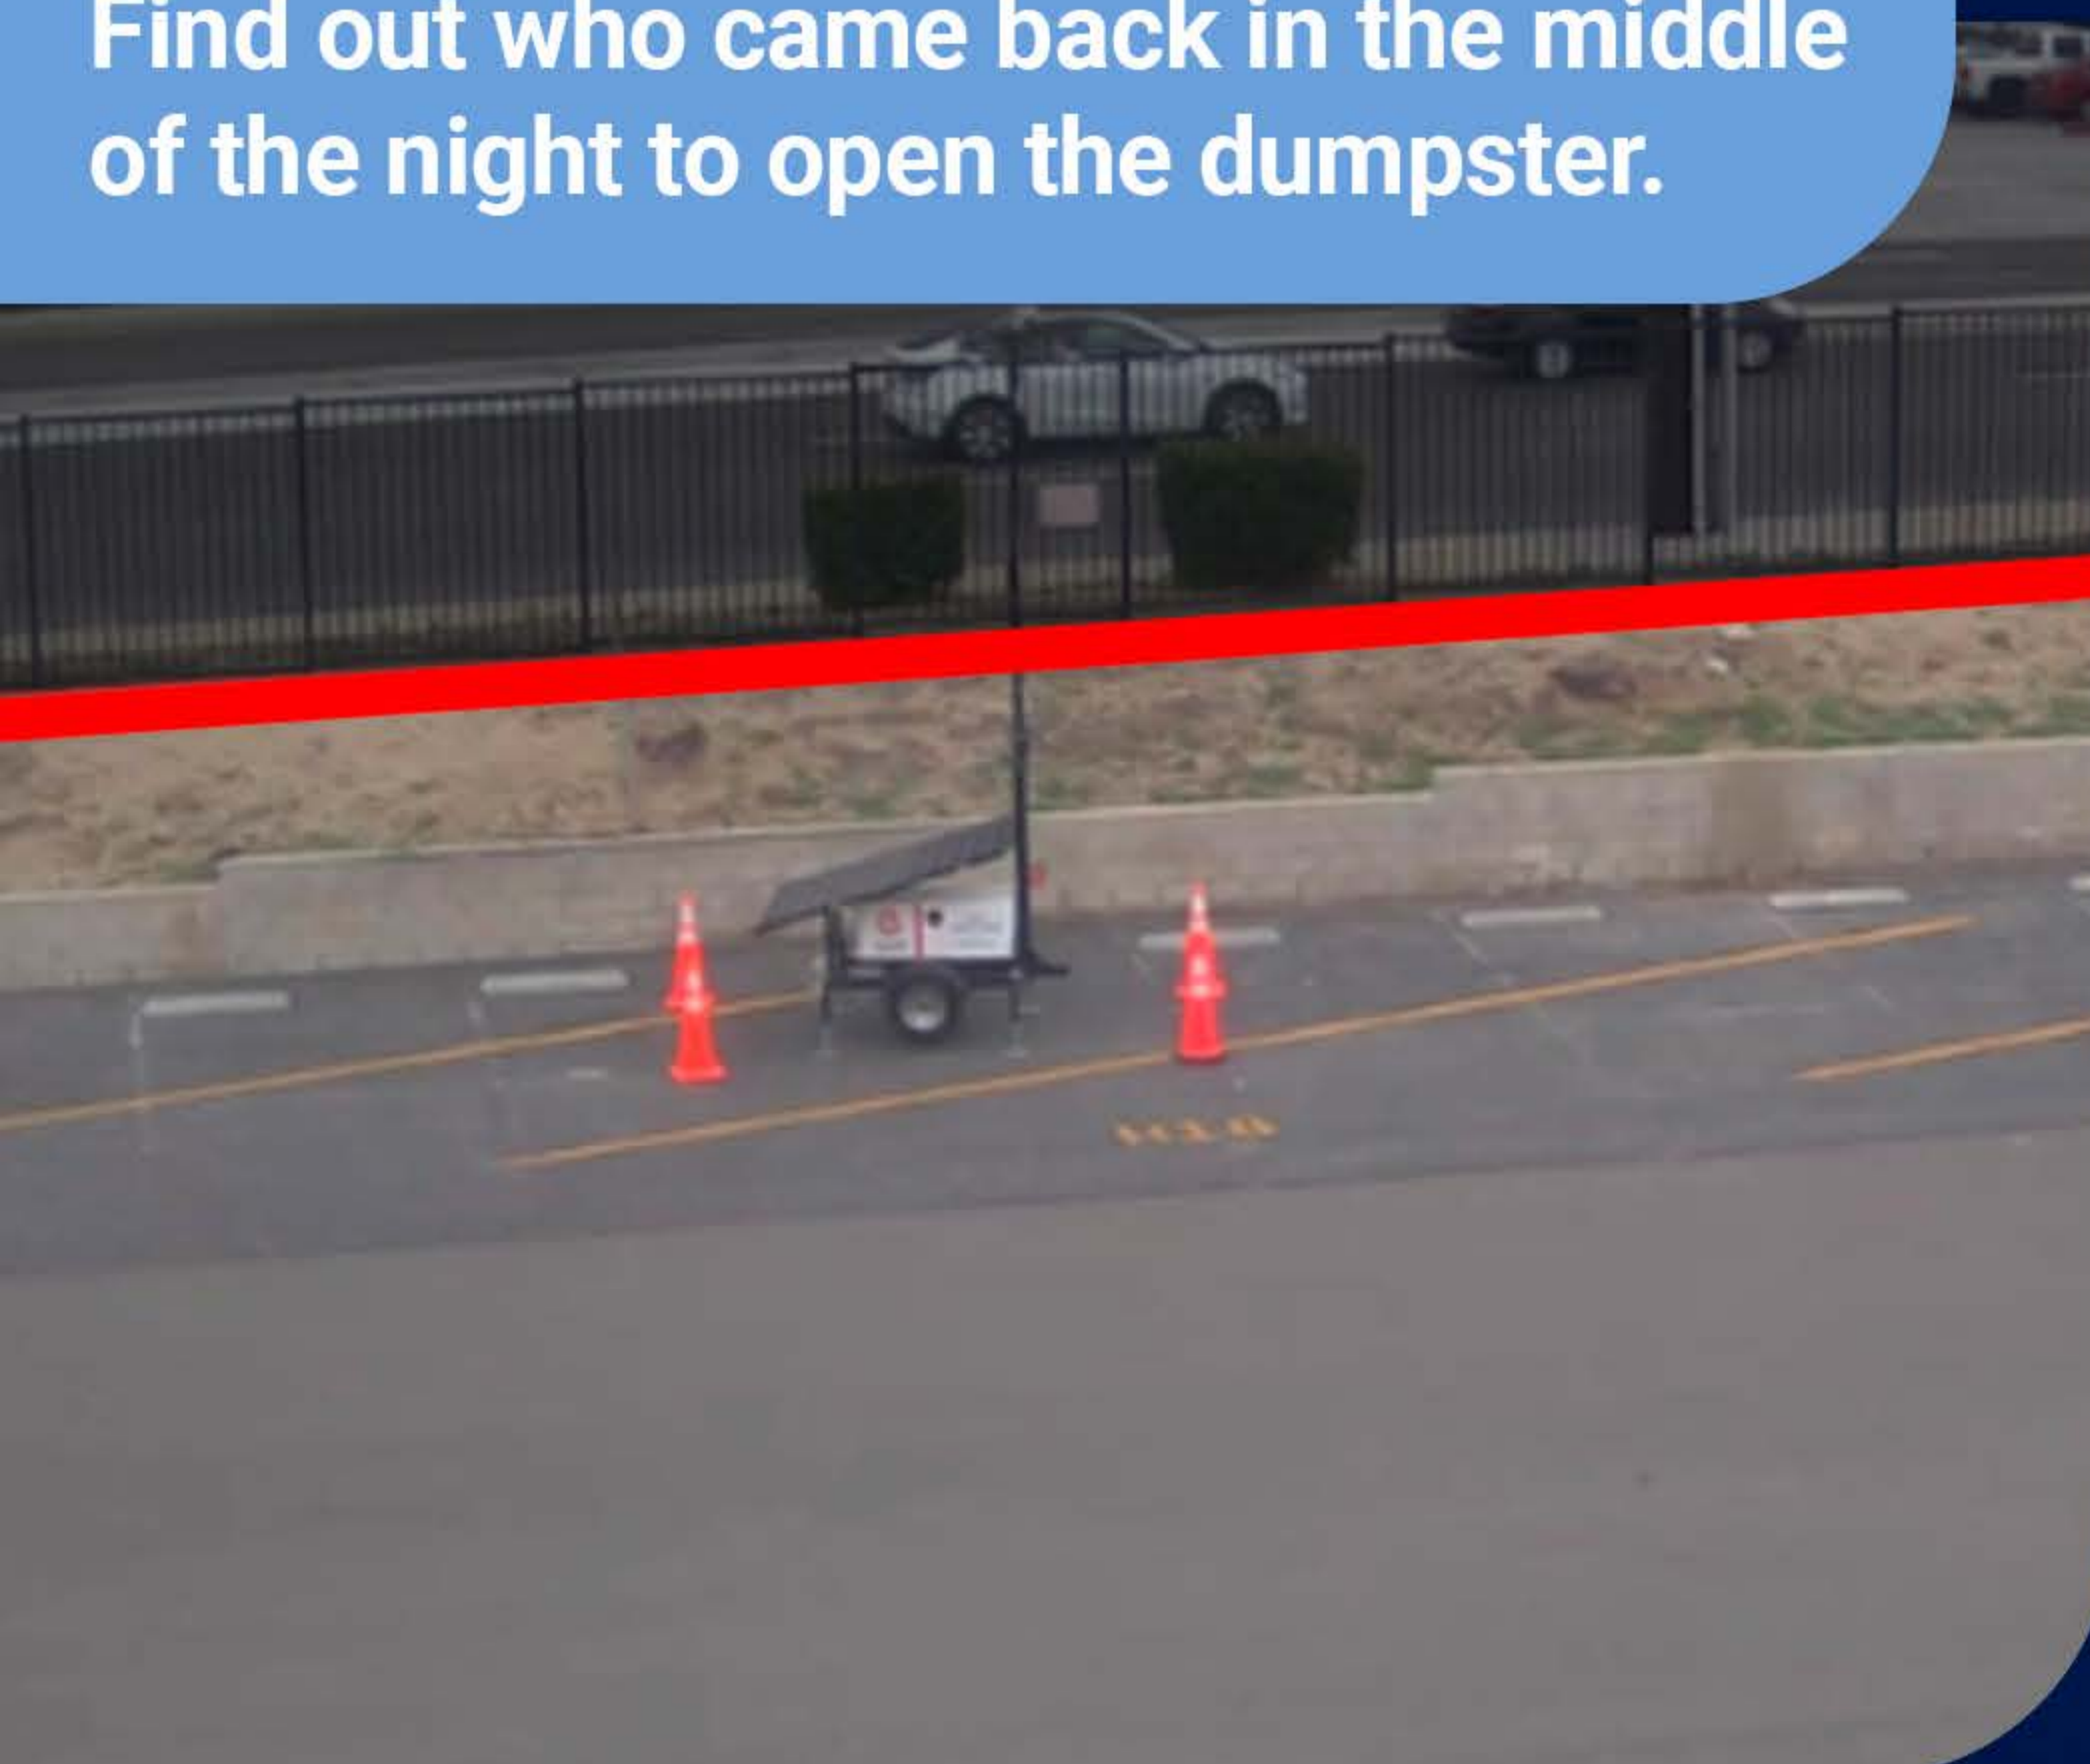

Rest assured with our 24/7 monitoring solutions.

- Sleep well knowing that professional security analysts are checking your cameras when your burglar alarm gets triggered in the middle of the night.
- **We run daily tests of your cameras connectivity.** All cameras in your jewelry store are checked upon any triggered alarm.

Eyeson AI Fence

Find out who came back in the middle of the night to open the dumpster.

- **Our AI Fence offers a two-way audio and video response,** protecting your jewelry against trespassing and vandalism.
- Surround your jewelry with AI based perimeter intrusion detection. **Eyeson AI Fence** does not fall asleep and monitors multiple cameras through the night with greater efficiency and accuracy than human guards-based monitoring.

Get your security system up and running with a faster response time:

- 24/7/365 Remote Support
- Expandable
- Automated Case Management
- Field Technicians
- People Counting
- Face Recognition with cloud portal search
- Video Verified Intrusion Detection (optional add-on)
- Audio embedded into 4K video footage

And much more!

Get peace of mind knowing everything that happens at your POS!
